

Wellvibe 2.0 highlights

Responsive Design Technology

Phones, tablets and desktop computers are a part of our every day life, and now users can access Wellvibe anytime, anywhere, anyway they prefer. Responsive design technology helps Wellvibe size down to any device.

Improved Sign In Experience

Users now have options when it comes to signing in! Whether it is their personal email address and custom password, or using the handy 'Forgot Password' link when they just can't seem to remember, signing in is a breeze.

Scheduled Reports

Customized dashboard reporting, ad hoc queries and scheduled emailed reports are all included in this updated release.

Enhanced Interface

The new Wellvibe 2.0 interface is clean and simple for users to adapt to. We kept the activities simple to understand and complete. The new notifications feature helps users stay up to date.

New Communication Tools

Administrators and Employees can now communicate with each other from within Wellvibe. Activity notifications, Wellvibe email, calendar reminders and RSVP event registration are just a few new communication tools in 2.0.
